EXPERIENCE

LegalPass SA | Lausanne, Switzerland

Full-stack development for a legaltech platform serving start-ups and small businesses (Laravel/PHP, React/TypeScript, Kubernetes, Python)

Junior Software & Data Engineer (permanent) Apr. 2026 – Present

- Architect core backend features on the app in Laravel/PHP, with front-end support in React/TypeScript.
- Scale and maintain the data-collection lakehouse built during the master's thesis in Python.
- Continue DevOps support with Kubernetes and Helm.

Data Engineer Intern (Master's Thesis) Sep. 2025 – Mar. 2026

- Designed and implemented a data-collection infrastructure to aggregate, normalize, and serve business-register data from all 26 Swiss cantons, spanning API sources and web scraping.
- Built the ETL pipeline and data-lakehouse architecture now in production at the company.

Software Engineer Intern Feb. 2025 – Aug. 2025

- Refactored a complex legal-document generation pipeline, ensuring stable transactional flow across model creation and updates.
- Built a variable store and a formula compiler tailored to the platform's variables and operators.
- Refined a condition composition system driving dynamic document-generation UX.
- Owned UI/UX features end-to-end: gathered requirements with the product owner, designed the interaction, and shipped the implementation.

EDUCATION

MSc in Computer Science | EPFL, Lausanne 2022 – 2026

Specialization in Cybersecurity. Master's thesis completed in-company at LegalPass SA (6.00/6.00).

BSc in Computer Science | EPFL, Lausanne 2019 – 2022

CEFR B2 in German | Goethe Institut, Hamburg 2019

SELECTED PROJECTS

- **Language compiler (Scala):** Full compiler for a programming language, from lexing/parsing through code generation.
- **Decentralized file-sharing & messaging system (Go):** Peer-to-peer system for distributed file sharing and group messaging.
- **VR game prototype (Unity, Meta Quest 2):** Design and prototyping of an immersive VR experience.
- **OCR post-processing for multilingual text:** Semester research project improving OCR output across languages.
- **Alternative controls on educational rhythm game (Swift, iPad):** Master semester research project designing an educational rhythm game with controls through motion & sound detection.

SKILLS

Proficient: Laravel, PHP, React, TypeScript, Python, Kubernetes, Helm, Docker, Git, PostgreSQL, Jira
Familiar: Redis, Java, C, C++, Scala, Go, Swift, C#, Rust, Unity, Godot
Spoken languages: French (native), English (C1), German (B2)

OTHER

Swiss Army: Recruit School & RC, intelligence soldier, Payerne Air Base (2018).
